Becoming the “Retail No.1” financial services group

Resona Group always considers how it can contribute to society through its financial services as it continues to evolve. We try to understand, define and solve customers’ latent concerns and management issues. Our fundamental stance is that “Customers’ happiness is our pleasure.” We want customers to need us and have high expectations for us. Our goal is to become the “Retail No.1” financial services group.

Editorial policy (on issuing this Integrated Report)

This publication is an Integrated Report that aims to explain in a simple manner to all stakeholders the Resona Group’s strengths and measures undertaken to create sustainable corporate value. Our hope is that, through this Report, readers will understand the reasoning behind the Resona Group’s goal of becoming the “Retail No.1” financial services group.

Further information about corporate social responsibility and financial data are available on our website.

We continue to evolve into a financial services company from a banking company with the DNA of reform that we have engendered through Resona reforms.

Corporation Mission

The Resona Group aims at becoming a true “financial services group full of creativity.” Towards this goal, the Resona Group will:

1) live up to customers’ expectations,
2) renovate its organization,
3) implement transparent management, and
4) develop further with regional societies.

Corporate Mission

The Resona Group links dreams and security, and contributes to creating a future beyond our customers’ expectations by taking the thoughts of each customer with care, and by being aware, thinking, and acting for ourselves.

Our aim is to deliver “a sense of excitement that exceeds mere satisfaction.”

Link Together, Shape Future

Customers' happiness is our pleasure.

The Resona Group cherishes relationships with customers.

Shareholders and “Resona”

Resona cherishes relationships with shareholders.

Society and “Resona”

Resona places importance on its ties with society.

Employees and “Resona”

Resona highly regards employees’ dignity and personality.

The Resona Group is the largest commercial banking group in Japan with full-line trust capabilities that can offer a single source of solutions for diverse customer needs.

We have established a solid business foundation in the Tokyo metropolitan area and the Kansai area.

The Resona Group focuses on retail loans. Loans to individuals and SMEs account for about 85% of its loan portfolio.

Although the Resona Group specializes in retail banking businesses, it has a superior cost to income ratio compared to the megabank groups and top-tier regional banks.

The Resona Group has a strong customer base in the Tokyo metropolitan area and the Kansai area, where economic activity and population are concentrated. Loan and deposit market share is particularly strong in Saitama Prefecture, where it exceeds 40%, and in Osaka Prefecture, where it is nearly 25%.

We will further evolve our value creation model to be “Retail No.1.”

Value creation model for becoming the “Retail No.1” financial services group

With a fundamental stance that “Customers’ happiness is our pleasure,” the Resona Group contributes to regional economies by providing overwhelming customer convenience and optimized solutions through business activities based on the Group’s strengths (“Activities”). The Resona Group will achieve sustainable growth together with its customers.

Social changes and issues

- Ongoing aging of society
- Population concentrated in urban areas
- Changing industrial structure
- Globalization is accelerating
- From savings to asset formation
- Diversifying lifestyles
- Evolution and spread of ICT
- Corporate social responsibility is increasing

Inputs

- 579 manned branches mostly in the Tokyo metropolitan area and the Kansai area
- The largest commercial banking group in Japan with full-line trust capabilities
- Diversity in human resources
- The latest, highly flexible IT infrastructure
- Sound financial position

Activities

- Customers’ happiness is our pleasure
- DNA of reform
- Focus on individual and SME customers
- The Group’s banks build ever-lasting relationships with their customers

Outcomes

- Overwhelming convenience
- Optimized solutions
- Development of regional economies
- Trust and support from customers
- Resona’s sustainable growth

Strengths of the Resona Group

Omni-channel

Omni-advisors

Omni-regional

Sophisticated corporate governance

[Relation]

[Reform]

[Retail]
We will make progress toward our vision of “Retail No.1” based on the fundamental stance that “Customers’ happiness is our pleasure.”

The Japanese economy recovered moderately during the fiscal year ended March 2017, with steady improvement in employment and income and through the impact of a strong overseas economy centered on the United States. However, the operating environment for financial institutions was extremely challenging due to factors including the impact of negative interest rates.

Under these circumstances, Resona Holdings’ consolidated actual net operating profit decreased by ¥56.8 billion from the previous fiscal year to ¥218.2 billion. Interest income decreased because the spread between deposit rates and loan rates narrowed in the low interest rate environment, and net gains on bonds decreased. An increase in the loan balance, solid income from corporate solutions and our commitment to low-cost operations partially offset these declines. Net income attributable to owners of the parent decreased by ¥22.3 billion to ¥161.4 billion with improvements in credit costs and other positive factors. We have maintained a sound financial condition, with the nonperforming loan ratio at 1.35% and the capital adequacy ratio at 11.69% as of March 31, 2017.

In February 2017, the Resona Group began offering “Resona Fund Wrap” with consulting services in which we provide proposals for optimizing asset allocation, and the total account balance exceeded ¥100 billion in June 2017. We also opened three Seven Days Plazas in the fiscal year ended March 2017 and added two more in May 2017, for a total of 16 Seven Days Plazas nationwide that are open every day. Overseas, in January 2017, we announced that we would acquire the shares of AFC Merchant Bank, a Singapore-based financial institution and make it a subsidiary. We are expanding our domestic and overseas networks in this way. Moreover, in March 2017 we announced a “basic agreement concerning a business integration” between Minato Bank, Kansai Urban Banking Corporation and Kirki Osaka Bank in order to create a new retail financial services model that is in step with the future of the Kansai region.

In April 2017, we launched our new medium-term management plan (Change to the “Next”). We view the maturing society, technological advancement, and change in societal and industrial structures as business opportunities, and we will create a next-generation retail financial services model to provide the best solutions for more customers, whenever and wherever they need us. The Resona Group will maintain its fundamental stance that “Customers’ happiness is our pleasure.” We are making the utmost effort to maximize corporate value as the “Retail No.1” financial services group that is most supported by regional customers as it walks with them into the future.

We are counting on your continued support.

July 2017

Kazuhiro Higashi

Director, President and Representative Executive Officer, Resona Holdings, Inc.
Chairman of the Board, President and Representative Director, Resona Bank, Limited
A Message from the President of Saitama Resona Bank

We aim to be a bank that the residents of Saitama Prefecture trust and that grows with the prefecture. We will work together in providing high-quality financial services to become the number one regional financial institution based on our corporate credo, “We preserve what we should preserve and we change what we should change.”

I would like to sincerely thank all stakeholders for their continued support and business with Saitama Resona Bank.

In the year ended March 2017, the economy of Saitama Prefecture recovered moderately overall. Corporate production activities and consumer spending were sluggish during the first half, but production activities and employment improved in the second half. While we need to remain alert to the impact of downside risk in the global economy, steady recovery should continue due to the effect of various policies in an environment of ongoing improvement in employment and income.

Saitama Resona Bank is part of the Resona Group, which under these circumstances in April 2017 announced a new medium-term management plan for the period ending March 2020. We will implement the three components of the Group’s “Omni Strategy,” which are integral to evolving the business model we have used since the Group was established to create a next-generation retail financial services model to provide the best solutions for more customers, anytime and anywhere.

During the new medium-term management plan, we will improve customer convenience and provide high-quality financial services by enhancing branches in Saitama Prefecture and improving the services we provide. Specifically, we renovated the Tsuruse branch in June 2017, and in November 2017 we plan to open our first branch in the Urawa-Misono area. We also plan to enter the Koshigaya Lake Town area in August 2018, and to successively renovate existing branches.

Moreover, the Saitama economic area is expanding rapidly because of the Metropolitan Inter-City Expressway and other transportation upgrades and improvements. Therefore, in April 2017 we opened offices for corporate customers in Gunma Prefecture, the Ota Business Office and the Takasaki Business Office to address a broad range of customer needs.

At the same time, branches are using tablets for paperless product and service explanations and expanding seal-less transactions, which has significantly reduced time required for procedures and made our services more convenient for customers to use. We will continue to take on the challenge of introducing various initiatives to further evolve into a new financial services company that is more creative than ever.

We will continue to work together to realize our founding vision of becoming a bank that the residents of Saitama Prefecture trust and that grows with the prefecture.

I would like to thank all stakeholders for their continued support and encouragement.

July 2017
Kazuyoshi Ikeda
Representative Director and President
Saitama Resona Bank, Limited

A Message from the President of Kinki Osaka Bank

We aim to grow with the community by exercising our main bank functions.

I would like to sincerely thank all stakeholders for their continued support and business with The Kinki Osaka Bank, Ltd.

During the year ended March 2017, the Kansai economy continued to recover moderately, largely because of production activities backed by the solid overseas economy. The future also looks bright due to factors such as strong inbound demand from the increased number of foreign visitors to the Kansai area and momentum from the World Expo 2025 bid.

At the same time, the corporate sector remained cautious because the recovery in personal consumption is not particularly robust and because of the manifest effects of the labor shortage.

In addition, the environment for financial institutions has been extremely challenging due to factors including the prolonged low interest rate environment and intense competition that goes beyond industry boundaries.

We are a regional financial institution that is part of the Resona Group, so given these circumstances, we are emphasizing relationships with customers in actively promoting finance that is closely aligned with communities, improving customer convenience, and revitalizing the regional economy by accelerating support for customer growth.

The goal of the Resona Group is to realize its vision of “Retail No. 1,” and in April 2017 we announced a new medium-term management plan for the period ending March 2020.

We will draw on Group initiatives to become “Retail No.1” with the goal of being the main bank that our customers truly trust and a bank that develops with the region. We will take approaches unique to Kinki Osaka Bank to help promote communities and fulfill our commitment to communities as a key component of the regional economy. We will also synergistically demonstrate Resona Group strengths including its sophisticated financial products and services, real estate and trust capabilities, and its network to solve customer issues.

In March 2017, Kinki Osaka Bank, Minato Bank and Kansai Urban Banking Corporation agreed to proceed with discussion and consideration for the purpose of business integration. The objectives of this business integration are to empower the integrated Group companies to deepen the relationships with customers and regional communities that each has established over the years, and to establish one of the leading regional financial groups in Japan and the largest regional financial group in the Kansai region. It will be a group where employees work with great motivation and pride in structuring a new retail financial services model that is in step with the future of the Kansai region.

I would like to thank all our stakeholders for their continued support and encouragement. We want to be the main bank for customers and grow with the community.

July 2017
Koji Nakamae
Representative Director and President
The Kinki Osaka Bank, Ltd.

### Non-Financial Highlights

#### Community

**Number of participants in “Re: Heart Club”**: 7,094

“The Heart Club,” the Group volunteer organization run by employees, engages in a range of activities such as local and environmental volunteer activities in an effort to resolve social issues in regional communities.

#### Next generation

**Number of participants in Resona Kids’ Money Academy**: 3,643

Through original quizzes and games devised by our employees, we explain to children the role of banks and the flow of money in society. To expand this initiative, we have arranged many collaborative programs with local enterprises and associations.

#### Diversity

**Proportion of female line managers**: 24.5%

To create a workplace environment that values diversity and allows people with diverse backgrounds to reach their full potential, we have set a target figure of 30% female line managers at Group banks by 2020 as part of diversity management.

#### Environment

**CO₂ emissions**: 63,127 t-CO₂

In 2008, we established the Resona Group Environmental Policies. By considering “what we can do as members of regional communities,” each employee is making an effort to reduce the usage of energy and paper in order to protect the global environment.

---

1. Net income attributable to owners of the parent – Preferred dividends
2. Shareholders’ equity – Balance of outstanding preferred shares, simple average of the balances at the beginning and end of the term
3. Net income attributable to owners of the parent – Preferred dividends / (Shareholders’ equity – Balance of outstanding preferred shares)
Overview of the New Medium-term Management Plan

Retail No. 1

A financial services group that is most supported by regional customers as it walks with them into the future

Creation of “Next-generation Retail Financial Services Model”
Accomplishment of Medium- to Long-term Income Structure Reforms
(Period of Plan: FY2017 – FY2019)

Basic Strategies

1. Evolve “Omni-channel” strategy
   - Best solutions for more customers, anytime and anywhere

2. Develop 26,000 “Omni-advisors”
   - All Resona staff provide solutions
     (Consultants who can understand the true latent needs of customers)
   - Diverse solutions menu

3. Establish “Omni-regional” platform
   - Expansion of Resona’s open platform
   - Full-scale introduction of “Smart Store”

Business Strategies

- Settlement business
- Succession business
- SME business
- Loan business
- Asset formation support business
- Total life solutions
- Retail
  - Trust
  - Asset Management
  - Real Estate
- Solutions for business growth, turnaround and succession

Four Foundation Reforms ~ More sales staff and higher productivity ~

- HR management reform
- Network reform
- Organizational reform
- Business process reform

1. Approach customers Resona has not had effective contacts with
2. Address customers’ needs Resona has not been able to grasp
3. Find profit opportunities Resona has not been able to reach
In April 2017, we launched our new medium-term management plan for the next three years called Change to the “Next.”

In Japan, structural changes that have a tremendous impact on financial businesses are accelerating, including a changing demographic structure, further maturation of society, changes in the financial sector accompanying technological advancement, and the advent of a new era of competition across industry boundaries.

We see these structural changes as a significant opportunity, and we will generate sustainable growth by quickly creating a next-generation retail financial services model that is aligned with the changing financial behavior of our customers.

The basic strategies of our medium-term management plan are 1) evolve “Omni-channel” strategy, 2) develop 28,000 “Omni-advisors”, and 3) establish “Omni-regional” platform. These strategies lay out a roadmap for the future of retail financial services that the Resona Group envisions beyond changes and chart a path toward sustainable growth (please refer to pages 18-20 for details about our basic strategies).

Our business strategy involves a commitment to growth, turnaround, and business succession solutions and total life solutions that are closely aligned with the growth stage or life stage of our customers. Resona will undertake expansion of the SME business and the loan business by raising the capability to assess clients’ business (feasibility assessment capability), diversification of solutions, and the provision of high-value-added products. We will substantially increase recurring fee income by reinforcing initiatives such as asset formation support (assets under management) and succession solutions that leverage the strength of our affiliation with Japan’s largest commercial bank with full-line trust capabilities and asset management companies. We will also utilize our advanced, highly convenient settlement services that respond to rapid technological innovation (please refer to pages 22-29 for details about our business strategy). Our medium-term management plan is based on the fundamental stance that “Customers’ happiness is our pleasure,” so we will continue to enhance the comprehensive strengths of the Resona Group to realize our vision of “Retail No.1.”

We designed our medium-term management plan to compensate for reduced loan income due to low interest rates by implementing income structure reforms. We will expand the balance of loans, substantially increase recurring fee income and reduce expenses through cost structure reforms. In the challenging environment with ultra-low interest rates, our goal is net income attributable to owners of the parent of ¥165.0 billion for the year ending March 31, 2020, which would be an increase of approximately ¥3.5 billion compared with the year ended March 31, 2017. The three years of our medium-term management plan will be a period to develop tolerance to the ultra-low interest rate environment and build the foundation for further growth as we approach the 20th anniversary of Resona’s establishment in the year ending March 2023.

Inorganic growth

Further growth

Resona’s 20th anniversary year

Notes:
1. Reflects the impact of integrating regional banks in the Kansai region on which related parties reached basic agreement on March 3, 2017
2. (Net income attributable to owners of the parent – Preferred dividends) / (Total shareholders’ equity – Balance of outstanding preferred shares), simple average of the balances at the beginning and end of the term
3. Excludes unrealized gain on available-for-sale securities, net of tax effect
Basic Strategy 1: Evolve “Omni-Channel” Strategy
We will evolve the Omni-channel strategy we have been implementing to create a system that can provide the best solution for more customers, anytime and anywhere. We will continue to strengthen face-to-face and non-face-to-face channels and enhance the linkage between them.

In face-to-face channels, we are expanding contact points with formerly underserved working people at Seven Days Plazas that are open year-round, and plan to increase these retail outlets that are open on holidays by around 30. At the same time, we will fully deploy our expertise in pilot outlets operated by a small number of people to restructure our retail outlet network.

In non-face-to-face channels, we will expand exclusive website/smartphone-based services. We will also seamlessly integrate our channels with a framework that can make use of face-to-face channels as needed.

Thus, we will approach customers we have not had effective contacts with, address customer needs we have not been able to grasp, and find profit opportunities we have not been able to reach.

Basic Strategy 2: Develop 26,000 “Omni-Advisors”
Omni-advisors are people who can delight customers by providing value-added, customer-oriented solutions. We are best able to differentiate the Resona Group if all of our staff are able to truly take the perspectives of customers to understand customer concerns and issues and then deliver information that provides options and starting points for solutions.

We will also improve productivity through digitalization. We started using tablets for insurance applications in 2016, which reduced application time by about one-third. This created significantly more time for consultation, so in 2018 we plan to begin using tablets for our investment trust business. These initiatives will build an organization in which all Resona staff provide solutions.

Basic Strategy 3: Establish “Omni-Regional” Platform
Our goal is to establish an Omni-regional platform with a regional strategy that has two main fronts: full-scale introduction of the Smart Store and expansion of our open platform. About 30% of the accounts at the Resona Smart Store were launched in 2016 belong to customers outside our operating area. This has made areas we could not previously reach into sales areas. We will use smartphone applications to expand tablet functions.

This approach is based on marketing reform. We will create a system that compiles and analyzes information gathered from our marketing channels and automatically generates personalized proposals.

Our three basic strategies are 1) evolve “Omni-channel” strategy; 2) develop 26,000 “Omni-advisors”; and 3) establish “Omni-regional” platform. These strategies will enable the Resona Group to create a next-generation retail financial services model in which it can approach customers it has not had effective contacts with, address customer needs it has not been able to grasp, and find profit opportunities it has not been able to reach.
as a platform to deliver even more valuable, convenient services that are aligned with customer interests and preferences.

Open platform expansion will involve adding a diverse array of relationships with regional financial institutions. We will develop new business areas to build win-win relationships with regional financial institutions, whether or not these are based on capital alliances. In addition, we intend to further strengthen our highly efficient operating system and expand functions that are highly compatible with the banking business. We will also take on the challenge of new areas such as fintech and artificial intelligence.

Our capital management policy will entail the optimal balance among higher capital adequacy, investment for future growth and increase in shareholder returns.

We will secure sufficient capital under the currently applicable Japanese standard and aim for a common equity Tier 1 (CET1) ratio (excluding net unrealized gains on available-for-sale securities) of approximately 9.0% under the international standard. Our target level for our capital adequacy ratio in the final year of the medium-term management plan involves the following three points.

1. Further contribute to regional communities and economic development in ways such as steadily supplying funds and providing services
2. Secure capital as a financial institution that is trusted worldwide and generate sustainable growth
3. Ensure strategic flexibility for responding to investment opportunities and financial regulations

In addition, we will emphasize capital efficiency, risk, cost and return in managing capital with the consistent target of ROE above 10%.

For shareholder returns, we have been increasing returns to common shareholders by acquiring and canceling preferred shares and then realocating the preferred dividends on those preferred shares to common shareholders.

During the year ending March 31, 2018, we intend to acquire and cancel ¥100 billion of Class 5 preferred shares, subject to the approval of regulatory authorities. Regardless of the timing of the acquisition and cancellation of the preferred shares, we plan to increase the annual dividend per share of common stock by ¥1.00 yen to ¥20.00 yen for the year ending March 2018.

Moreover, we will maintain stable dividends following this dividend increase, and we will consider further expansion of shareholder returns while considering the balance between financial soundness, profitability and opportunities to invest in growth.
Business Strategy

Asset Formation Support Business

Institutional preparations such as NISA expansion and the amendment of the Defined Contribution Pension Act are moving forward backed by growing asset formation needs in an ultra-low interest rate environment and an aging society. Under these circumstances, the Resona Group will focus on the individual asset formation support business that provides solutions with a customer-oriented approach and a medium- and long-term perspective.

In February 2017, the Resona Group began offering fund wrap accounts, which leverage its strength as a commercial bank with full-line trust capabilities. About 30% of fund wrap account customers have not purchased our investment trusts before, which shows this product is attractive to a broad range of customers because its objective is stable management of a long-term, diversified investment portfolio. The objective of our fund wrap initiative is to increase individual asset formation support products under management to ¥6 trillion by March 31, 2020, an increase of 40% compared with the year ended March 31, 2017.

In addition, the amended Defined Contribution Pension Act was enacted in January 2017. This significantly expanded the scope of applicants eligible for iDeCo. The Resona Group’s response has included energetically meeting with corporate customers and public employees to promote understanding of this system while significantly improving Internet capabilities. As a result, we are an industry leader in the number of new defined contribution pension plan accounts opened. We will continue these initiatives with the objective of increasing the number of iDeCo customers to 500,000 in the year ending March 31, 2020 to expand our customer base.

Settlement Business

Japan’s cashless settlement ratio, which is the ratio of payments using means such as credit cards, electronic money and debit cards, is only about 20%. Meanwhile, countries including the United States and South Korea have a ratio of over 50%. Given the expansion of Internet sales, technological innovation including fintech and government measures to promote this area in light of the Tokyo Olympic and Paralympic Games in 2020, significant growth in cashless settlement is likely. The Resona Group was among the first financial institutions to start handling debit cards, and we now have a settlement amount with a growth rate of more than 30% annually.

Under these circumstances, the Resona Group will provide advanced, convenient services through original products and services aligned with customer needs and through more sophisticated marketing. We are also intensifying fintech initiatives. For example, in 2016 Resona Bank chaired a consortium to build a 24-hour real-time remittance infrastructure in Japan and overseas using blockchain technology provided by U.S. company Ripple. In April 2017, Resona Holdings also established a settlement division and created a system that enables the Group to rapidly expand the valuable settlement services it provides.

For individual customers, in addition to the full introduction of the Smart Store, we are enhancing convenient and affordable services for a broader array of customers by making debit cards standard as cash cards for new accounts from October 2017. For corporate customers, we partnered with an e-commerce site developer to offer the multi-settlement Resona Pay Resort site, and are also concentrating on supporting start-ups with comprehensive packages of solutions.

The objective of these initiatives is to increase income from settlement services to ¥61.0 billion in the year ending March 31, 2020, an increase of ¥5.0 billion compared with the year ended March 31, 2017.
While the inheritance market is expanding due to the aging of Japanese society and because inheritance tax amendments have doubled the number of people subject to taxation, inherited assets continue to flow into major metropolian areas, which are the foundation of the Resona Group’s operations. In addition, the presidents of many SMEs are aging, which makes business succession a key management issue.

Under these circumstances, the Resona Group will provide solutions capabilities as Japan’s largest commercial bank with full-trust line trust capabilities and a full lineup of trust services to resolve customer concerns about succession and make the Group Japan’s number one brand for succession solutions.

The large customer base unique to commercial banks includes a considerable number of potential premier segment customers that the Resona Group has not been effective in creating relationships with to date. We will approach these customers more aggressively. Specifically, Resona Bank will increase the number of Trust Offices staffed with solutions specialists to 150 from the current 80. In addition, the number of staff with the highest financial planning certification will increase to 1,600 from 1,000 as we quantitatively and qualitatively enhance our sales capabilities.

Expanding our customer base will also include approaching the customer base of our partner companies more aggressively. Specifically, in November 2016 we initiated full availability of an M&A platform managed by Resona Bank with the participation of about 20 regional banks, and we are enhancing our alliances with about 30 trust agencies.

The objective of these initiatives is to increase succession-related income to ¥14.0 trillion in the year ending March 31, 2020, an increase of ¥4.0 trillion compared with the year ended March 31, 2017.

Approach 600,000 Potential Premier Customers

- Major Increase in Trust Offices
  - March 31, 2017: 400 trusts
  - March 31, 2019: 1,000 trusts

- Increase in Solutions Specialists
  - FP1 Qualification (March 31, 2017): Approx. 1,000
  - New Combined (March 31, 2017): Approx. 5,000

Across the Customer Base of Regional Banks and Other Partners

- Real estate brokerage for individuals
- M&A
- Succession trust capabilities

Succession-related income (Billions of yen)

SME Business

Corporations in Japan have shifted from being short in funds to having redundant funds by consistently suppressing asset growth and reducing debt since the 1990s. Moreover, the operating environment of corporate customers is changing significantly due to factors including the changing industrial structure and accelerating globalization. At the same time, the government’s current growth strategy is backed by increasing demand for funds, primarily for capital investment.

Under these circumstances, the Resona Group will transform its business model centered on loans. We have 400,000 corporate customers, of which 80,000 have obtained loans from us. We will offer all of our corporate customers optimal, perfectly timed solutions for their growth stage in order to make Resona the No.1 brand for SMEs.

We will also introduce sales force automation, a sales support system that uses IT, and we will distribute tablets to all staff serving corporate customers to simultaneously improve our sales capabilities and productivity.

One objective of these initiatives is to increase loans to SMEs to ¥11 trillion yen by March 31, 2020, an increase of about 10% compared with March 31, 2017. Another objective is to increase income from solutions and international businesses by ¥10.0 billion to ¥35.0 billion in the year ending March 31, 2020.

Approach 240,000 Potential Premier Customers

- Participating in cross-border transactions (March 31, 2017): Approx. 500
- Participating in non-core transactions (March 31, 2017): Approx. 2,800

Access the Customer Base of Regional Banks and Other Partners

- Strengthen Partnerships with Trust Agents
- Resona’s individual and corporate customer base

Main initiatives

- Increase the number of staff who are solutions specialists and assign them to branches
- Diversify solutions, including succession-related trusts, M&A, business withdrawal and transformation, MBID and UBO
- Make trust and real estate capabilities standard Group offerings

Resona Group Integrated Report 2017
Support during Start-up and Growth Phases

We look at both financial results and potential growth capability in providing support for funding and operations for customers in the start-up phase.

We also provide a diverse array of loan products and various solutions including business matching, support for advancing overseas and other services for customers in the growth phase.

Support for SME Customers Advancing Overseas, Mainly in Asia

- Services offered by domestic branches, JV banks, overseas representative offices and overseas partner banks
- Overseas alliance network has expanded to 17 partner banks covering 14 countries and regions

Support for Healthcare and Welfare Businesses Growth

Corporations in healthcare and welfare businesses generally have more capital and human resource constraints than corporations in other industries. We are enhancing our ability to help them by addressing their management support, business succession and funding needs. We offer various types of support in collaboration with external corporations with strengths in healthcare and welfare markets.

Initiatives to Revitalize Communities

The Resona Group is committed to developing together with communities, and we energetically support the management of SME customers and the revitalization of regional economies.

Moreover, the Resona Group has established the Regional Revitalization Council to contribute to regional revitalization. Also each Group bank has established a Council on Revitalization of Town, Population and Jobs.

Furthermore, in September 2016 Resona Bank and Kinki Osaka Bank established Business Plaza Osaka as a base for developing new businesses to solve community problems together with public organizations, universities, research institutes, corporations and local communities.

Saitama Resona Bank reorganized the Public Facilities Management Support Office into the Project Development Office in April 2017 to further support public-private partnerships in ways such as providing solutions and information for community revitalization.

Support for Healthcare and Welfare Businesses Growth

Corporations in healthcare and welfare businesses generally have more capital and human resource constraints than corporations in other industries. We are enhancing our ability to help them by addressing their management support, business succession and funding needs. We offer various types of support in collaboration with external corporations with strengths in healthcare and welfare markets.

Initiatives to Revitalize Communities

The Resona Group is committed to developing together with communities, and we energetically support the management of SME customers and the revitalization of regional economies.

Moreover, the Resona Group has established the Regional Revitalization Council to contribute to regional revitalization. Also each Group bank has established a Council on Revitalization of Town, Population and Jobs.

Furthermore, in September 2016 Resona Bank and Kinki Osaka Bank established Business Plaza Osaka as a base for developing new businesses to solve community problems together with public organizations, universities, research institutes, corporations and local communities.

Saitama Resona Bank reorganized the Public Facilities Management Support Office into the Project Development Office in April 2017 to further support public-private partnerships in ways such as providing solutions and information for community revitalization.

The Resona Group is strengthening its system to support companies advancing overseas. We are expanding our overseas network, which is focused on Asia but also includes the United States. We provide in-market information and business matching services through Resona staff stationed at partner banks.

In January 2017, we announced that we would make AFC Merchant Bank of Singapore a subsidiary. AFC is a Singapore-based financial company founded in 1981 to develop infrastructure in the ASEAN region, and it has an established customer base and deep knowledge of the region.

We will expand our services overseas by providing loans, M&A services and consulting to customers advancing into ASEAN and India through AFC in Singapore, which is a financial hub.
The pace of change in the individual loan business environment is accelerating because of the prolonged ultra-low interest rate environment, the diversification of personal lifestyles and digitalization driven by ICT in general and smartphones in particular.

Under these circumstances, the Resona Group will focus on enhancing the competitive advantages of its products and services while strengthening cost controls to be the No. 1 individual loan provider.

We are strengthening sales by further enhancing convenience through means including industry leadership in holiday operation, credit screening and loans; completely handling application, response and contract closing via websites and smartphones for consumer loans; and fully embracing the Smart Store. We have high-value-added products such as the Danshin Kakumei (housing loan) and the Resona Premium Card Loan (consumer loan), and we are enhancing our lineup additional products.

In addition, we are promoting digitalization to effectively cut costs and reduce the time needed for administrative procedures. For example, we propose an insurance review when closing housing loan contracts to ensure that we suggest solutions at the most appropriate time. The objective of these initiatives is to increase the housing loan balance to the ¥1 trillion level by March 31, 2020, an 8.8% increase compared with March 31, 2017, and the consumer loan balance to the ¥360 billion level, an increase of 12%.

The spread of ICT has increased expectations that transactions will be easy and add exceptional value. In addition, we need to assume that the contraction of Japan’s workforce will make hiring sufficient numbers of employees difficult. Under these circumstances, the Resona Group will use digitalization to implement cost structure reforms that both increase customer convenience and raise productivity. We will create a next-generation retail financial services model.

We have already achieved good results by changing transactions in ways such as introducing tablets for insurance applications and sales support systems. We have also halved the amount of administrative work through operational reforms.

We will use the expertise we have acquired and employ digital technology to further reduce administrative work and reinforce initiatives to enhance our solutions capabilities.

Specifically, we will add sales staff by transferring administrative personnel with the objective of creating an organization of 26,000 Omni-advisors that serve customers.

We will optimize branch networks by expanding branches specializing in consultation that can be managed by a small number of staff.

Executive Transparency

Resona Group has a majority of outside directors on its Board, and is the first Japanese banking group with a nominating committee and other committees. Resona Group has thus structured a sophisticated corporate governance system that ensures transparency and impartiality.

Resona Group Integrated Report 2017
Customer reactions to the plan vary regardless of age. Some may respond quickly to the ideals and changes expressed in the plan, while others who are basically only interested in traditional banking services may have little interest. Customers may require a considerable amount of time to understand and buy into the new management plan, which in turn may mean that the plan takes longer than expected to contribute to earnings.

During the implementation of this plan, the Audit Committee will pay particular attention to whether employees are under too much pressure to produce earnings, whether employees are fulfilling their fiduciary duty to customers, and whether the Group is preventing cyberattacks in the promotion of digitalization.

I am committed to developing people who can lead the Resona Group and optimizing their deployment.

My name is Tadamitsu Matsui and I have been appointed Chairperson of the Nominating Committee. I am resolute in my responsibility for developing and deploying the human resources that are directly related to our growth.

Achieving the goals of the new medium-term management plan is important to becoming “Retail No.1.” Developing 26,000 Omni-advisors is a particularly important factor of the plan, an initiative that will be the first in the industry. Customer needs become more personalized and sophisticated every year. The Resona Group needs to identify these needs, breakdown the needs into targets, and empower all employees to meet these targets through their day-to-day work. The steady accomplishment of that result will help the Resona Group achieve its targeted outcomes. I intend to put my experience in corporate management and as an outside director at other companies to work in the Resona Group initiatives. I want the Resona Group to stay abreast of social change while nurturing talented people who can execute without being constrained by changes in the operating environment. This will require perspectives from outside the banking industry, which I will be aggressive and focused in nurturing.

I am committed to achievement with the cooperation of everyone in the Resona Group.

I would also be delighted if shareholders and investors look forward to growth for the Resona Group.

As Chairperson of the Audit Committee, I will create the environment for achieving the vision of becoming “Retail No.1.”

My name is Yoko Sanuki and I am Chairperson of the Audit Committee. I will create the environment for achieving the Resona Group’s new medium-term management plan, which in turn may mean that the plan takes longer than expected to contribute to earnings.

As Chairperson of Audit Committee, I will pay particular attention to whether employees are committed to helping corporate customers grow their business, both in Japan and overseas. I will leverage my experience as an outside director at other companies to help executive officers take appropriate risks. I will also collaborate on alliances and M&A with fintech companies.

As the Chairperson of the Compensation Committee, I will structure a compensation system that is linked to medium- and long-term business goals, and work to enable shareholder returns.
Corporate Governance

Basic Approach to Corporate Governance

Resona Holdings, Inc. (hereinafter the “Company”) has established the “Basic Corporate Governance Policy” to facilitate the sustained growth and improvement of the corporate value of the entire Group (hereinafter the “Group”) over the medium and long term.

- The Company, as the holding company of the financial services group, including Resona Bank, Limited, Saitama Resona Bank, Limited and The Kirin Osaka Bank, Ltd. (hereinafter the “Group Banks”), shall maximize the corporate value of the Group.
- The Company shall respect all stakeholders, including shareholders, and aim at achieving excellent corporate governance so that the Company can make decisions rapidly and decisively in response to environmental changes, including economic and social changes.
- The Company shall establish the “Corporate Mission (Resona Group Management Philosophy),” a general philosophy of management of the Group, and the “Resona Way (Resona Group Corporate Promises),” a specific form of the philosophy, under which the Group shall implement business operations in a concerted manner.

The Company’s Corporate Governance System

- Based on the above-mentioned basic approach to corporate governance, the Company shall clearly separate the management supervision function from the business execution function, and adopt the form of a “company with a nominating committee, etc.” as a corporate governance system because the Company determines that this system can enhance the supervision and decision-making functions of the Board of Directors.
- The Company shall fully utilize external views in its business management and secure transparency and fairness in management by making the Board of Directors, on which highly independent outside directors constitute a majority, and the three committees (the Nominating Committee, the Compensation Committee and the Audit Committee) fulfill their functions.
- The Company shall ensure the autonomy of its subsidiaries and instruct the subsidiaries to manage their business activities based on the above-mentioned basic approach to corporate governance so that the Group will grow together with regional communities.

Other Matters Related to Corporate Governance

Self-Evaluation of the Board of Directors

The Company’s Board of Directors conducts an annual analysis and evaluation of its effectiveness as a whole based on the opinions of each director with regard to their assessment of the operations and functionality of the Board as well as matters discussed at the Board of Directors meetings. The Board of Directors utilizes the results of the evaluation to make improvements in its operations and to enhance its supervisory and decision-making functions.

The evaluation of fiscal 2016 concluded that the operations of the Board were appropriate on the whole and the overall effectiveness of the Board of Directors was confirmed.

The selection of meeting agendas and the preparation of meeting materials were identified as issues requiring improvement in the self-evaluation. The self-evaluation identified year-on-year improvement in both areas, but concluded that preparation of meeting materials requires further improvement. In addition, the Board identified that it needs to focus on initiatives to improve the selection of meeting agendas for enhancing discussion of strategy implementation and to make even better use of the knowledge of outside directors. The Board of Directors will enhance the content of discussions by improving its operations based on input such as the opinions of each director.

Resona Succession Plan

Aiming for sustained improvements in corporate value, the Group introduced a succession plan in June 2007 that serves as a mechanism to ensure the successions of the top management roles and responsibilities at the Company and each Group bank and secure the transparency of the process of selecting and nurturing directors.

The scope of the succession plan covers various candidates, from those who are candidates for the next generation of top leadership to those who are new candidates for directorships. The process of selection and nurturing successors is carried out steadily according to a schedule, matching qualified candidates to the appropriate rank. The Group retains the objectivity of this process by drawing on the advice of external consultants. Evaluations of candidates undergoing the process are reported to the Nominating Committee. In addition to receiving reports on candidate evaluations, members of the Nominating Committee come into direct contact with candidates as part of the process, evaluating candidates’ characters from various angles.

The activities of the Nominating Committee are reported to the Board of Directors, of which outside directors are the majority, and are discussed from diverse perspectives. Through the entire process, which is highly transparent, each potential director’s capabilities and competencies are closely studied and enhanced where appropriate.

In addition, Resona Holdings has set forth seven competencies that define the ideal candidate for the position of director. By ensuring that the directors in the Nominating Committee as well as the other directors share common ideals regarding candidates, the Company clarifies standards for the evaluation and nurturing of successors and thereby aims to realize impartiality during the entire process.

Overview of Compensation Policy for Directors and Executive Officers

The Company’s compensation policy is as follows.

Basic Approach
- Remuneration for directors and executive officers is determined by the Compensation Committee following objectives and transparent procedures.
- Compensation systems for executive officers are focused on rewarding the performance of their primary duty of providing sound supervision of executive officers.
- Compensation systems for executive officers are designed to maintain and boost their motivation to carry out their business execution duties, with the performance-based variable portion accounting for a significant proportion of their total compensation. In addition, with the aim of promoting the Group’s sustainable growth and strengthening incentive systems for executive officers on a medium- to long-term basis to enhance its corporate value, the Company has adopted Performance Share Units.

1. Compensation System for Directors

Compensation for directors consists of position-based compensation and a duty-based additional portion in cash. In order to further ensure sound supervision of executive officers, performance-based compensation was abolished as of June 2017.

2. Compensation System for Executive Officers

Compensation for executive officers consists of position-based compensation and performance-based compensation. Performance-based compensation comprises cash compensation determined on the basis of the Company’s annual operating results as well as Performance Share Units, which reflect medium- to long-term results. In order to maintain and increase motivation to fully carry out business, a significant percentage of compensation is accounted for by performance-based compensation (details follow). Furthermore, the composition of compensation paid to executive officers who take senior positions places a greater emphasis on the performance-based variable portion. Any executive officer holding a concurrent position as a director is paid only the amount of compensation due as an executive officer.

### Risk Appetite Framework

Framework for Formulating and Executing Strategies to Support Sustainable Growth

To realize the strategy of becoming the “Retail No.1,” the Resona Group organically correlates earnings, risk, capital, and other components; maintains an organization and system that are capable of formulating consistent plans; and structures PDCA frameworks to support the formulation and execution of strategies.

Formulation of Management Strategies and Plans

In formulating management strategies, the Company clarifies the business areas that actively take risks based on the analysis of internal and external environments. Based on multifaceted and sufficient discussions, management strategies are decided at the Board of Directors meeting of Resona Holdings, Inc., the majority of which consists of outside directors. The divisions in charge of business execution then formulate the detailed plans based on such resolution.

More specifically, based on the characteristics and strengths of the Group’s businesses and taking into consideration the short-term and medium-to-long-term issues, and ensuring that the operational policies formulated by the Group companies and business divisions are consistent within the Group, the “funding and earnings plan,” “risk limit plan,” and “capital adequacy ratio plan,” etc. are defined. Through the risk management division’s stress tests, these plans undergo potential sustainability verification to confirm that risk-taking and risk-control during the plan period are possible.

Operation and Management of Plans

During the plan period, progress and verification results of these plans are regularly reported to the Board of Directors. At the Board of Directors meeting, in-depth and vigorous discussions are held in an effort to realize the strategies. To ensure the feasibility of the strategies, the results of the discussion are reflected in the strategies, flexible reviews of operational management during the period, and reviews of organizational structures.
Risk Management

Basic Approach to Risk Management
We deeply regret the serious concern and inconvenience that the application for an injection of public funds in May 2003 caused the people of Japan, our customers, and other stakeholders. Consequently, we have established the risk management principles below to enhance our risk management systems and methods as well as risk control. The Resona Group conducts its risk management activities with an eye to securing the soundness of operations and enhancing profitability.

1. We will not assume levels of risk in excess of our economic capital.
2. We will deal promptly with losses that we have incurred or expect to incur.
3. We will take risks appropriate for our earnings power.

Risk Management Policies and Systems
The Company has established the Group Risk Management Policy that serves as the Group’s basic risk management policy. Based on the Group Risk Management Policy, each Bank has established its own risk management policy that is tailored to its operations, unique characteristics, and the risk it must address.

The risk management policies of the Company and the Group banks create a basic framework for managing risk by defining the types of risk that must be managed and establishing organizations or systems that manage risk.

The Company and the Group banks have established risk management departments for managing different types of risk, along with a Risk Management Division, to integrate the management and control of all types of risk. Principal risk categories are outlined below, and each risk is managed using a method that is tailored to its characteristics.

Comprehensive Risk Management
Comprehensive risk management has been formed within the Company and the Group banks, and each of these divisions is responsible for comprehensive risk management of the Group and the banks, respectively. Each Group bank measures the volume of credit risk, market risk, and operational risk using the risk management indicator values at risk (VaR) and establishes risk limits (makes risk capital allocations) on these types of risk. Risk management is conducted to control risk within these established limits.

When the Group banks set their risk limits, the Company holds prior consultation with each bank and verifies the details of the limits to be established to confirm the soundness of the Group as a whole. In addition, the Company receives periodic reports from the Group banks regarding the status of risk management and confirms the status of comprehensive risk management of the Group.

In addition, although the Company is constantly improving the quality of risk management through various means, including the application of the VaR method, there are risks that cannot be quantified by statistical risk management methods. Based on this fact, the Company and Group banks strive to study and understand the incompleteness and specific weak points of the VaR method, thereby assessing and recognizing the impact of such limitations of their risk measurement. For risks that cannot be identified or quantified by the VaR method, the Company and the Group banks conduct qualitative assessment through various stress testing and the use of risk-assessment mapping. In this way, the Group aims to enhance the quality of its comprehensive risk management.

VaR, or value at risk, is a risk management indicator that is calculated using statistical methods to measure the maximum loss that may occur with a specified confidence interval (probability) and over a specified period.

Group Management by Resona Holdings
The Company provides common guidance and direction to all Group companies regarding risk management policies, standards, and systems.

The Group management framework requires that Group companies confer with the Company in advance of making decisions on important matters related to risk management and base their decisions on those consultations.

In addition to providing direction to Group companies regarding risk management policies as well as rules, standards, and systems, the Company verifies risk management policies, rules, standards, and systems at all Group companies through prior consultation, thus controlling the Group risk management framework.

Group companies must report to the Company regarding the risk conditions and their management on a regular and as-needed basis so that the holding company can provide guidance and direction as necessary.

As shown by the chart below, we have formed risk management divisions within the Company for managing each type of risk on a Group-wide basis.

Risk Category, Definition and Management Methods

Compliance

**Basic Activities**

The Resona Group defines compliance as the strict observance not only of laws and regulations, but also social norms and has positioned compliance as a key management issue. As the basic activities to put compliance into practice, the Resona Group has established its Corporate Mission, which forms the basis for the judgments of directors and employees; the Resona Way (the Resona Group Corporate Promise), which outlines the basic stance, based on the Corporate Mission, that directors and employees should take toward all Group stakeholders; and the Resona Standards (the Resona Group’s Behavior Guidelines), specific guidelines about behavior expected from directors and employees under the Corporate Mission and the Resona Way. The Corporate Mission, the Resona Way, and the Resona Standards are applied uniformly across Group companies, and the related handbook is distributed to all directors and employees, and trainings are regularly arranged at all workplaces.

**Group Management System**

Group Compliance Management System

The Compliance Division at Resona Holdings controls Group compliance and works with compliance divisions at Group companies to strengthen compliance systems groupwide. In addition, the Group has formed a Group Compliance Committee composed of the Company and Group companies as members, which discusses and evaluates all issues related to Group compliance.

System for Protecting Group Customers

The Company and Group banks are proactively working to make improvements in the quality of explanations to customers, responses to customer inquiries and complaints, the management of customer information, the management of conflicting interests in banking transactions, and other areas so that we can provide better responses and more convenience for customers. Specifically, we discuss and deliberate initiatives with responsible divisions and individuals in the Group Compliance Committee, etc.

Management of Customer Information

The protection of customer information is one of the most important factors in enabling customers to use the Group with peace of mind. We strive to properly manage customer information by publicizing the Promise to Protect Personal Information of All Group Companies, establishing a framework for protecting against leakage or loss of personal information, and conducting ongoing and thorough employee education.

Elimination of Anti-Social Forces

The Resona Group believes that preventing and eradicating transactions with anti-social forces are critically important to its public mission and social responsibility as a financial institution. Our basic approach is not to engage in transactions with anti-social forces and to prevent them from intervening in transactions with customers through the corporate activities of Group companies. The Group has set specific internal rules and regulations, as well as providing ongoing training and education on these compliance issues for directors and employees. In addition, we have formed cooperative relationships with law-enforcement agencies such as the police to prevent and nullify transactions with anti-social forces.

Internal Auditing

**Group Internal Auditing**

We believe that the role of internal auditing is extremely important to “live up to customers’ expectations” and “implement transparent management” as set forth in the Resona Group’s Corporate Mission. Accordingly, we have established internal audit divisions at Resona Holdings and Group companies.

In order to ensure sound and appropriate operations and to gain social trust in the business management systems established by the Company and Group companies, the internal audit divisions serve the essential function of facilitating improvements in corporate value by verifying and evaluating the systems from an independent standpoint and promoting improvements as needed in all management activities.

**Functions and Roles**

To guide the formulation of plans for internal auditing, the Internal Audit Division of the Company formulates the Annual Internal Audit Basic Plan based on prior discussion with the Internal Audit Division of the Company and secures approval of respective board of directors.

The internal audit division of each Group company formulates its Annual Internal Audit Basic Plan based on prior discussion with the Internal Audit Division of the Company and its Group companies conduct audits based on the Annual Internal Audit Basic Plan.

The results of internal audits of the Company are reported to its Board of Directors, the Audit Committee, and Representative Executive Officers, etc. The results of internal audits of the Group companies are reported to their respective boards of directors and auditors as well as the Company.

**Internal Auditing System**
Understanding the True Latent Needs of Customers

Basic Approach
The Resona Group has taken the initiative in diversity management and work-style reform. We will manage human resources based on new concepts that represent a revolution in working style rather than simply continuing our existing approaches. Our business model is at a major turning point because of technological innovations such as IT and AI. We are also focusing on nurturing 26,000 Omni-advisors as part of our medium-term management plan, and intend to shift personnel from administration to sales.

Motivated employees drive corporate activity. We will therefore provide more flexible ways of working and more career path options than in the past. Our goal is to be a company with diverse human resources that creates new value through diversity and inclusion.

Human Resource System
The management crisis of 2003, which is called the “Resona Shock,” led us to make the concept of diversity management that enables employees to work actively regardless of factors such as gender, age or job category the center of human resource management. Our human resource system has evolved to naturally reward people who excel and make a strong contribution. We therefore believe in consistent and equal evaluation and treatment regardless of job category under a system that provides the same compensation to everyone doing the same work.

A feature of our human resource system is the adoption of a job classification and personnel evaluation system that is shared by regular employees, smart employees (permanent employees with limits on working hours and scope of work) and partner employees (part-time workers). Assuming full-time work, the same job grade will receive the same compensation (basic compensation) on an hourly basis. We adjust for factors such as relative intensity of responsibilities with mechanisms including bonuses, retirement allowances and welfare programs. We have also introduced a promotion system, a transfer system and other mechanisms that allow employees to change jobs.

Work-Style Reform
Employees are at the center of our work-style reform. Ideally, each employee should be able to choose how to work according to work-life balance and career development choices. We therefore need to broaden our work-style and career path options to enable career growth and development.

We partially revised our human resource system in October 2015 to introduce the smart employee system in which a permanent employee can limit working hours or scope of work. The number of smart employees increased to 275 people (as of April 1, 2017) because some employees have chosen to handle childcare and nursing care while others have been promoted from the position of partner employee.

Society is increasingly focusing on working style. Employees who are conscious of working style support the productivit improvement that raises operating efficiency. We launched a telecommuting system in April 2017, and will continue to examine various work styles.

Human Resource Development
The Resona Group develops human resources using a system that provides opportunities for training regardless of factors such as job category. Employees can access business training, self-development training (business school) and home learning systems.

Digitalization will enable us to both expand points of contact with customers and improve operating efficiency. We need to build a system to support customers, including those customers we could not previously reach. This system will involve all employees, including those in administrative positions.

Throughout the Resona Group, in addition to developing human resources with the sophisticated expertise that empowers them to offer optimal solutions to customers, we will enable our Omni-advisors to understand the true latent needs of customers by truly taking the perspective of customers through high-quality communication.

Strategy for Developing 26,000 Omni-Advisors

Q: Developing 26,000 Omni-advisors is one of the basic strategies of the medium-term management plan. What is an Omni-advisor?

A: Together, the five requirements define an Omni-advisor as people who can understand the true latent needs of customers.

Q: What does “understanding the true latent needs of customers” mean?

A: Many customers have potential issues that they themselves do not yet realize. The ability of our Omni-advisors to understand the true latent needs of customers is the ability to give concrete expression to vague issues; that is, to draw out, correctly understand and clearly communicate customer concerns and needs. This process requires Omni-advisors to think of the customers’ concerns as their own.

Figure 1 highlights the three elements of the ability of our Omni-advisors to understand the true latent needs of customers. The commitment to resolving customer concerns is a particularly important element for all employees.

Kazuyo Shinya
Executive Officer, Head of Human Resource Services, Member of the Council for the Realization of Work Style Reform*

*Established in September 2016 as a venue to discuss ways to achieve equal pay for equal work, the council is chaired by Prime Minister Shinzo Abe. The council comprises relevant cabinet members and 15 experts.
Basic Approach to CSR Management

Relationship between Corporate Mission, Corporate Promises and CSR Policy

The Resona Group sees CSR management as contributing to the creation of a sustainable society. The Group’s Corporate Mission embodies the orientation of all officers and employees and expresses the values we should share. The Resona Way (Resona Group Corporate Promises) shapes our fundamental ideals (please refer to page 3). Our Corporate Mission and Corporate Promises represent our stance toward corporate social responsibility (CSR). The Group defines its CSR Policy in line with the core precepts of the international standard ISO 26000 in seven clearly specified social issues.

Corresponding SDGs

We examined the Resona Group CSR Policy from the perspective of the SDGs and reaffirmed the direction the Resona Group should take.

Foster a Corporate Culture Committed to Society

The Resona Group aims to resolve social issues as expressed in sustainable development goals (SDGs) to help create a more sustainable society. We fulfill our social responsibilities through our core businesses and actively contribute to society in a unique way.

What Are the SDGs?
The SDGs are ongoing objectives through 2030 that the United Nations adopted in September 2015. They encompass 17 goals and 169 targets to tackle global problems including global economic crises, natural disasters, environmental deterioration, refugees and poverty to realize a world in which nobody is left behind.

The Resona Group’s Corporate Social Responsibility

SDGs

CSR management = Contributing to the creation of a sustainable society

Resona Way
(Resona Group Corporate Promises)

Shareholders

Employees

Customers

Society

Corresponding SDGs

Specified Social Issues

Policies

Corporate Governance

We work to strengthen oversight and supervision functions for responsible management systems as well as management and achieve accountability for all the stakeholders.

Human Rights

We build a corporate culture and working environment that respect fundamental human rights of all the stakeholders we have an impact on, such as customers, shareholders, and employees.

Diversity

We promote people development and its fair assessment through opportunities for capacity development and firm establishment of the organizational climate of diversity.

Compliance

We engage in responsible corporate activities for all the stakeholders through compliance with laws, rules, and social norms.

Consumer Issues/Customer Services

We protect customers’ valuable personal information as well as assets and provide high-quality financial services and opportunities for enlightenment from customers’ perspective.

Community

We position symbiotic relationships with communities as our important mission and work on solving social issues by utilizing our experience and resources.

Environment

We value the irreplaceable global environment and properly conduct environmentally friendly corporate activities.
Priority CSR Issues (Materiality)

Priority CSR Issues for the Resona Group
We identified and began implementing initiatives unique to the Resona Group in four priority areas – Community, Next Generation, Diversity and Environment – to meet society’s expectations for CSR, helping to create a sustainable society and increasing corporate value.

Identifying Priority Issues
The Resona Group used the following four steps to identify its priority issues. We also periodically review our priorities and their order of precedence in line with changes in society and our business strategies.

1. Identify relevant social issues
   In line with the seven issues stipulated in the Resona Group CSR Policy (Corporate Governance, Human Rights, Diversity, Compliance, Consumer Issues/Customer Services, Community and Environment), we identified 22 social issues with reference to the ISO 26000 framework, the SDGs, the GRI Guidelines (G4), and items for external evaluation.

2. Consider priorities for the Resona Group
   We consider our priorities for the social issues identified in Step 1 based on our Corporate Mission, Business Strategy and Resona’s unique qualities, such as strengths, distinctiveness and brand enhancement.

3. Consider the degree of importance to stakeholders
   We consider the degree of importance to stakeholders, namely customers, employees, regional communities, Resona Group shareholders, investors, government and administrative organizations, business partners and NPOs/NGOs through interviews with external experts.

4. CSR Committee approval
   Chaired by the president of Resona Holdings and composed of the presidents of Group banks, the CSR Committee discusses and approves the priority issues.

Priority Issue 1
Bringing communities and people together

We contribute to communities and people by providing funds and financial services through our core businesses and Group network.

Community
Bringing communities and people together

Next Generation
Nurturing the next generation for the future

Diversity
Respecting diverse beliefs

Environment
Creating a pleasant environment for people and the planet

Contribution to Revitalizing Regional Economies
The Resona Group follows its Corporate Mission – To Develop Further with Regional Societies – by consistently providing capital and high-quality financial services to regional customers. The Group also uses its network to conduct seminars, fairs and other events that create new business opportunities and employment.

“Meet Up Kansai” helps young people build the future with their ideas
(Resona Bank, Kinki Osaka Bank)

“Thailand Economic Seminar”
(Saitama Resona Bank)

“Fundamentals of Entrepreneurship”
(Kinki Osaka Bank)

We use the fresh ideas of young people to solve the social problems that local companies and governments face in creating new business in the Kansai area.

We are building connections between Southeast Asian and local businesses to provide more opportunities for overseas growth.

We provide solid support for developing the talent who will create new industries through regular and expanded entrepreneurship classes.

Employee Participation in Community Building
Employees voluntarily participate in community events and volunteer activities in line with the issues and circumstances specific to each region. These activities also create organizational solidarity and a greater sense of unity among employees.

“Re: Heart Club,” the Group volunteer organization run by employees (Resona Group)

“Buy and Support! Kumamoto Support Project”
The Buy and Support! Kumamoto Support Project resulted from the goodwill of employees to support producers affected by the Kumamoto Earthquake. The project helped support reconstruction through purchases of products made in Kumamoto Prefecture, and 805 Group employees participated.

Social Contribution through Our Core Businesses
We use our financial products to help our customers more easily contribute to the community.

- Passport to Tomorrow: Privately placed bonds to nurture the next generation (Saitama Resona Bank)
- MyDo: Privately placed CSR bonds (Kinki Osaka Bank)

We help customers raise money and simultaneously support the community by using a portion of the fees received by Group banks to issue privately placed bonds to purchase school supplies and donate them to local schools.
Nurturing the next generation for the future

We are taking approaches unique to a financial services company in nurturing the next generation, including passing on assets to the next generation through financial products and services, and the dissemination of financial knowledge.

Contributing to Improving Financial Literacy

Acquiring sound financial knowledge and the ability to make appropriate financial decisions are increasingly important for young people given the growing sophistication and complexity of personal finance options. The Resona Group empowers young people to be more independent, reassured and affluent in their daily lives by leveraging its strengths and resources to provide financial and economic education through programs such as “Resona Kids, Money Academy,” “Economics Kosheen, Workplace Experience,” and “School Visit.”

“Resona Kids’ Money Academy” is a financial and economic education activity for children. (Resona Bank, Saitama Resona Bank, Kinki Osaka Bank)

Over 28,000 students have participated in this program since its launch in 2005.

Supporting Children in Making Their Dreams Come True

We help children reach their full potential and achieve their dreams.

“Resona Day Camp” (“Resona Foundation for Future”) We established the “Resona Foundation for Future” so that the children responsible for the next generation will not give up on their dreams due to economic reasons. “Resona Day Camp” encouraged interaction among volunteers and the parents and children of single-parent families.

Award ceremony and exhibition of All Japan Culture Festival for Schools for the Disabled (Resona Group) Resona Holdings holds an award ceremony at its Tokyo head office, and exhibits works at the head offices of each Group bank in Tokyo, Osaka and Saitama.

Support for the Succession of Assets and Businesses to the Next Generation

With the social issue of inter-generational succession of assets and businesses coming to the fore because of Japan’s super-aging society, the Group provides meticulous support by leveraging its financial and trust banking capabilities to create a social environment that enables smooth and steady succession.

Asset Succession Trust “My Trust Mirai Anshin Zu” (My Trust for Future Peace of Mind) This trust helps protect funds and secure the future for our customers and their loved ones.

Resona business succession consulting (Resona Bank, Saitama Resona Bank, Kinki Osaka Bank) We provide trust products such as trust for transfer of own company stock and leverage many years of experience and expertise in real estate brokerage business to give advice so that succession is smooth.

Resona’s “My Strength Project” (Resona Group) We promote diversity within the Group and also help create a society where diverse people can excel in ways such as supporting human resource deployment for our corporate customers.

Projects Led by Female Employees

Female employees lead projects to help the Resona Group be the financial services company most supported by customers.

Resona Women’s Council, an advisory body directly reporting to top management regarding the creation of work environments in which everyone can have a long career and support for career development. This had led to institutional reform.

“Cannael,” a loan for women that supports their aspirations for the future

Body Revolution,” a new health insurance product based on Healthy Life Expectancy Guidelines

We embrace the power of women as consumers, creators and economic influencers by providing original financial products and information from a unique Resona perspective.

Helping Corporate Customers Promote Diversity

As lifestyles evolve and the world becomes increasingly borderless, we are tasked with developing talent and creating a working environment that benefits from diverse beliefs and creativity. The Group is implementing various initiatives to push forward with the creation of such an environment.

“Re:Woman’s Meeting 2017” (Resona Group) Since it was organized in April 2005, the Resona Women’s Council has made suggestions to top management regarding the creation of work environments in which everyone can have a long career and support for career development. This had led to institutional reform.

“Resona Kids’ Money Academy” has received external recognition.

This activity, which has been nurturing children in cooperation with communities for twelve years, received several awards in 2016.

• 14th Corporate Philanthropy Award, sponsored by the Japan Philanthropic Association
• Award for Companies Promoting Experience-based Learning Activities for Youth, sponsored by the Ministry of Education, Culture, Sports, Science and Technology

External Recognition of Diversity (Year ended March 2017)

Acquired L Star certification based on the Act of Promotion of Women’s Participation and Advancement in the Workplace Certified companies: Resona Bank, Saitama Resona Bank and Kinki Osaka Bank

Level 3 L Star certification is based on the Act of Promotion of Women’s Participation and Advancement in the Workplace and certifies that the recipient company has created a work environment that enables women to excel. Resona Bank and Saitama Resona Bank have acquired Level 3 certification, and Osaka Kinki Bank has acquired Level 2 certification.

Selected as a Nadeshiko Brand (Ministry of Economy, Trade and Industry/Tokyo Stock Exchange)

The Nadeshiko Brand project selects and recognizes leading companies in terms of providing opportunities for women to work in different ways and providing support for realizing work-life balance. The Resona Group has been selected in the Banking category for three consecutive years.

Resona’s “My Strength Project” (Resona Group) We promote diversity within the Group and also help create a society where diverse people can excel in ways such as supporting human resource deployment for our corporate customers.

Creating a pleasant environment for people and the planet

We support environmentally conscious customers by providing environmentally friendly products and services, as well as our employees who actively volunteer for environmental programs.

Initiatives to Use Financial Functions to Reduce Environmental Burden

Our investment and loan decision-making process and mindset take environmental impact into account. We provide environmentally friendly products and cooperate with governments on environmental issues to actively help customers who wish to protect the environment.

Resona’s “Eco-Vision Diversity Company” loans (Resona Bank)

We cooperate with Osaka Prefecture to provide loans to support SMEs that are working on environmental and diversity issues.

Environmental Management to Reduce Environmental Burden

We have established a Group environmental policy to clarify our approach to the environment and appropriately conduct environmentally friendly corporate activities. We also set annual Group environmental targets and have an environmental management system that uses the PDCA cycle to achieve those targets.

Resona’s “Eco-Vision Diversity Company” loans (Saitama Resona Bank)

We cooperate with Saitama Prefecture to provide loans to support SMEs that are working on environmental and diversity issues.

Resona’s “Eco-Vision Diversity Company” loans (Kinki Osaka Bank)

Osaka Prefecture makes grants available for specified greenery projects within designated promotion areas, and Kinki Osaka Bank and Osaka Prefecture have concluded agreements covering issues such as providing information to promote this greenery project.

Corporate Initiatives to Protect the Local Environment

We fulfill our role as a good corporate citizen that cooperates with society through various social contribution activities related to the conservation of the natural environment and biodiversity.

Resona’s “Eco-Vision Diversity Company” loans

We cooperate with Osaka Prefecture to provide loans to support SMEs that are working on environmental and diversity issues.

Initiatives to Protect the Local Environment

We support environmentally conscious customers by providing environmentally friendly products and services, as well as our employees who actively volunteer for environmental programs.

Summary of Consolidated Statements of Income

Gross operating profit | 637.1 | 608.5 | 632.4 | 619.5 |
(1) Net interest income | 443.0 | 430.0 | 425.9 | 401.3 |
(2) Trust fees | 21.6 | 23.7 | 22.7 | 21.7 |
(3) Fees and commissions income | 128.9 | 135.0 | 146.4 | 147.4 |
(4) Other operating income | 19.7 | 19.7 | 19.5 | 20.6 |
(5) Net gains on bonds (including futures) | 25.5 | 19.1 | 19.5 | 30.6 |
Cost-to-income ratio (OHR) | 55.49% | 57.56% | 56.00% | 55.61% |

Other operating income decreased by ¥24.9 billion from the previous fiscal year to ¥24.5 billion. Net gains on bonds (including futures) decreased due to changes in the interest rate environment.

(2) Financial Review for FY2016

Income Summary

(A) Consolidated gross operating profit decreased by ¥56.4 billion from the previous fiscal year to ¥563.1 billion. Factors included a decrease in net gains on bonds, although an increase in loans and bills discounted partially offset the decrease in net interest income that was primarily due to contraction of the loan to deposit spread.
(B) Interest income decreased by ¥23.4 billion from the previous fiscal year to ¥377.9 billion. Balance of loans and bills discounted increased, but the impact of negative interest rates was one of the factors that caused the loan to deposit spread to narrow.
(C) Fees and commission income decreased by ¥4.7 billion from the previous fiscal year to ¥142.7 billion. Financial product sales were sluggish in an unstable market environment, although income from corporate solutions and loans increased.

Balance Sheet Summary

(H) Loans and bills discounted increased by ¥521.7 billion from the previous fiscal year-end to ¥28,186.7 billion, led by growth of housing loans and loans to SMES. The NPL ratio for Group banks in aggregate decreased 0.16 percentage points to 1.35%.
(I) Securities decreased by ¥50.9 billion from the previous fiscal year-end to ¥27,642.9 billion due largely to the increase in loans and bills discounted. As a result, the capital adequacy ratio decreased by 1.84 percentage points from the previous year to 11.69%.

Capital Adequacy (Basel 3, Japanese Domestic Standard)

(L) Despite net income for the year of ¥161.4 billion, total capital decreased by ¥222.4 billion due to the acquisition and cancellation of Class 6 preferred stock in December 2016 and the repayment of subordinated bonds, etc. Risk-weighted assets, the denominator in the capital adequacy calculation, increased by ¥738.2 billion largely due to the increase in loans and bills discounted. As a result, the capital adequacy ratio decreased by 1.84 percentage points from a year earlier to 11.69%.

Notes: 1. (Net income attributable to owners of the parent – Preferred dividends) / (Shareholders’ equity – Balance of outstanding preferred shares); simple average of the balances at the beginning and end of the term
2. (Net income attributable to owners of the parent) / Total assets, simple average of the balances at the beginning and end of the term

*Application of transitional arrangements
Gross operating profit of Resona Bank decreased by ¥31.3 billion year on year to ¥352.2 billion due to a decrease in net interest income associated with contraction of the loan to deposit spread and a decrease in net gains on bonds, which was partly offset by increases in loans and bills discounted and fees and commissions. Operating expenses were essentially unchanged year on year at ¥214.2 billion. Actual net operating profit decreased by ¥31.4 billion year on year to ¥137.9 billion. Net income increased by ¥0.4 billion year on year to ¥101.3 billion due to factors including gain on reversal of credit expenses and an increase in net gains on stocks.

Gross operating profit of Saitama Resona Bank decreased by ¥15.3 billion year on year to ¥43.3 billion due to a decrease in net interest income associated with contraction of the loan to deposit spread and a decrease in net gains on bonds, which was partly offset by an increase in loans and bills discounted and higher fees and commissions from corporate customers. Operating expenses were essentially unchanged year on year at ¥74.8 billion. Actual net operating profit decreased by ¥15.4 billion year on year to ¥47.2 billion. Net income decreased by ¥5.4 billion year on year to ¥34.7 billion despite positive factors including gain on reversal of credit expenses and an increase in net gains on stocks.

Gross operating profit of Kinki Osaka Bank decreased by ¥7.6 billion year on year to ¥43.3 billion due to a decrease in net interest income associated with contraction of the loan to deposit spread and a decrease in net gains on bonds. Operating expenses were essentially unchanged year on year at ¥37.6 billion. Actual net operating profit decreased by ¥7.7 billion year on year to ¥30.5 billion. Net income decreased by ¥14.8 billion year on year to ¥17.5 billion. Gain on reversal of credit expenses as in the previous fiscal year partially offset the absence of income gains associated with tax-effect accounting adjustments in the previous fiscal year.

---

**Notes:**
1. Loans and bills discounted is the sum of bank accounts and trust accounts.
2. Actual net operating profit is the amount of gross operating profit (excluding the amount of disposal of problem loans in the trust accounts) less operating expenses such as personnel expenses.
